

An Attractive, Durable Finish For Sheds

A flooring designed and warranted specifically for sheds, LP® ProStruct® Flooring with SmartFinish® features a durable overlay for a beautiful, professional-grade appearance. With no knots or voids, it's a welcome change from building with traditional plywood flooring. Plus, unlike plywood shed floors, LP® ProStruct® Flooring with SmartFinish® is treated with the LP® SmartGuard® process for longer-lasting performance in a variety of climates/weather.

Features & Benefits

A Shed Floor With Protection Against Decay & Damage

The shed floor you've been searching for is here, specially treated with SmartGuard® wood strand technology to resist fungal decay and termite damage.

An Easy Shed Floor Install

The LP® ProStruct® Flooring with SmartFinish® installs like conventional floor panels.

Knot and Void Free

Durable overlay for a professional-grade appearance with no knots or voids so your shed floor is as durable as it is attractive.

Longer-Lasting Performance

SmartFinish® flooring has excellent resistance to warping, splitting and cupping.
