

Site Prep

SMALL STRUCTURES

Alpine Structures offers several of these site-prep options.
Ask your salesman for availability in your area.

level limestone base

1. Limestone base should be 12" larger than building on four sides.
2. Remove 3-4" of sod.
3. Fill back in with No. 8 or No. 57 limestone.
4. Make sure entire area of limestone is level.

patio block base

8"x16" x 2" thick concrete patio blocks are placed underneath each skid a maximum of 6' on center.

block/4x4" foundation

4x4"s are placed crossways underneath building. 4x4" supported with solid concrete blocks on low side and dug into ground (as needed) on high side.

great for smaller sheds!
